

Fuse 2017: The Good, The Amazing, and the More to Come

ISE2

Fuse 2017 saw more attendees (over 100!) from more companies (more than 30!) creating more technology updates than at any point during the event's four-year existence.

There was some big news that came out of Fuse, with more big news on its way. In the weeks ahead, we'll be sharing more details about the award winners and how their development will affect your Orion experience. Today, though, we want you to know that during Fuse we saw the first glimpse of a **Prospect Portal** that will allow you to engage with your prospects in Orion in all-new ways, and we also got to see the unveiling of a new automated solution to help **improve the service provider diligence process** from this year's Best in Show winner, RIA in a Box.

Much more information will be coming about those two developments, and many more, soon. For now, let's look back the summaries of Fuse so you can experience the conference for yourself.
