Kensington Asset Management claims compliance with the Global Investment Performance Standards (GIPS<sup>®</sup>) and has prepared and presented this report in compliance with the GIPS<sup>®</sup> standards.

Kensington Asset Management has been independently verified for the period of January 1, 2008 through December 31, 2020.

An investment in securities involves risk, including loss of principal. Returns are presented net of fees and include the reinvestment of all income. Performance represents past performance.

### Investment Objective

The Dynamic Growth Strategy is designed to tactically alternate between a "Risk-On" state in response to advancing equity markets and a "Risk-Off" state during times of market weakness. The Strategy is designed for investors who seek equity-like returns but wish to reduce the volatility and drawdown that comes with passive investment in equities.

### About the Strategy

The Strategy uses a proprietary trend-following model to identify and act on prevailing market sentiment. The model provides weekly signals to guide the Strategy's allocation. Dynamic Growth rotates between two investment modes:

**Risk-On:** When markets are generally trending upward, Dynamic Growth allocates to equity index ETFs and / or mutual funds. This allows the Strategy to participate in the equity markets when the Strategy's trend-following approach observes conditions in the equity markets are favorable.

**Risk-Off:** When the trend reverses to one of decline or high volatility, Dynamic Growth shifts into U.S. Treasuries and / or cash. This helps protect principal and mitigate drawdowns.

### Morningstar<sup>®</sup> Classification

Tactical Allocation

Morningstar<sup>®</sup> Rating

The Dynamic Growth Strategy received a 5-Star Overall Morningstar<sup>®</sup> Rating as of June 30, 2021. The Strategy was rated against the following numbers of Morningstar<sup>®</sup> rated composites over the following time periods: 358 tactical allocation composites in the last 3 years and 283 tactical allocation composites in the last 5 years. With respect to these tactical allocation composites, the Dynamic Growth Strategy received a 5-Star rating overall, a 5-Star rating for 3 years and a 5-Star rating for 5 years. Past performance does not guarantee future results. There can be no assurances the Strategy will meet its investment objectives.

### Inception Date

December 31, 2014

The Dynamic Growth Strategy is managed by Kensington Asset Management, LLC. Additional information about the Strategy and the adviser can be obtained by viewing company disclosure documents available upon request. Past performance does not guarantee future results.

### Dynamic Growth Composite (Net)

	Q1	Q2	Q3	Q4	Annualized
2021	6.16%	7.57%	3.29%		17.95%
2020	18.37%	14.80%	14.37%	-6.53%	45.26%
2019	20.81%	-4.35%	1.25%	3.94%	21.62%
2018	-1.60%	10.78%	7.30%	-15.49%	-1.15%
2017	13.90%	5.34%	1.45%	11.97%	36.30%
2016	7.68%	1.67%	-0.28%	2.53%	11.94%
2015	3.36%	3.90%	-7.68%	2.47%	1.59%

\*Inception calculation based on the inception date: 12/31/2014.

^Standard Deviation: A measure of the dispersion of monthly returns from its mean return, also known as historical volatility. Sharpe Ratio: A risk-adjusted measure that indicates return per unit of risk, defining risk as volatility (standard deviation). Sortino Ratio: A variation of the Sharpe Ratio that includes only the standard deviation of negative portfolio returns instead of the total standard deviation. Maximum Drawdown: A measure of the maximum loss from a peak to a trough of a portfolio or index, before a new peak is attained. Upside / Downside Capture %: A measurement of performance relative to positive or negative periods for the benchmark. Correlation: A measurement of the degree to which two indices move in relation to each other.

Past performance is not indicative of future returns and the value of the investments and the income derived from them can go down as well as up. Future returns are not guaranteed and a loss of principal may occur.

There is no guarantee any investment strategy will generate a profit or prevent a loss. Investing in securities involves risk, including loss of principal. The risks associated with this Strategy include general market risk, credit risk, interest rate risk or risk of the portfolio not performing as expected.

A firm that claims compliance with the GIPS® standards must establish policies and procedures for complying with all the applicable requirements of the GIPS® standards. Verification provides assurance on whether the firm's policies and procedures related to composite and pooled fund maintenance, as well as the calculation, presentation, and distribution of performance, have been designed in compliance with the GIPS® standards and have been implemented on a firm-wide basis.

GIPS® is a registered trademark of CFA Institute. CFA Institute does not endorse or promote this organization, nor does it warrant the accuracy or quality of the content contained herein.

Results are based on fully discretionary accounts under management, including those accounts no longer with the firm. The U.S. Dollar is the currency used to express performance. Net of fee performance was calculated using the model investment management fee of 1.5%. All accounts were non fee paying.

The Dynamic Growth Strategy was previously known as Nasdaq Unconstrained Growth Tactical Allocation Model from inception through June 2020, and the Enhanced Equity Strategy from June 2020 to July 2020.

Fee schedule: fees are negotiable and may be ≤ 1.5% annually. The annual composite dispersion presented is an equal-weighted standard deviation calculated for the accounts in the composite for the entire year. Performance figures provided reflect the deduction of a 1.50% annual investment advisory fee. Policies for valuing portfolios, calculating performance, and preparing GIPS® Reports are available upon request. A list of composite descriptions is available upon request. The composite was created in January 2015 and only includes accounts with a minimum of \$100k.

The types of securities held by a comparison benchmark may be substantially different from the investment strategy. An investor should consider the investment objectives, risks, charges, and expenses of the investment and the strategy carefully before investing. The S&P 500 TR Index is a capitalization weighted index of 500 stocks representing all major domestic industry groups. The S&P 500 TR Index assumes the reinvestment of dividends and capital gains. It is not possible to invest in an index, and index returns do not include management fees.

Investment returns will be reduced by advisory fees and other expenses charged in the management of a client's account. You should carefully review applicable fees disclosed in Form ADV, Part 2. You should understand how ongoing advisory fees, compounded over a number of years, reduce the value of your investment portfolio, as investment balances and potential gains on the investment balances are reduced by fees. Additional information is provided in the SEC Investors Bulletin "How Fees and Expenses Affect Your Investment Portfolio."

Advisory services offered through Kensington Asset Management, LLC, 6207 Bee Caves Rd, Ste 250, Austin, TX 78746. Mr. DeLaurentis is an investment adviser representative of Kensington Asset Management, LLC.
