Net of Hypothetical 3.00% Fee*

*Orion Portfolio Solutions requires that strategy performance is shown net of a hypothetical 3.00% fee. The net performance shown below reflects this hypothetical 3.00% annual fee. It is calculated and deducted on a monthly basis. 3EDGE Conservative Strategy's composite net performance will vary from the net performance shown here.

Firm Facts as of 11/30/22
Firm AUM/AUA **\$1.66B**

 Firm AUM: \$1.37B Firm AUA⁺: \$294.86M

⁺Assets Under Advisement (AUA) includes non-discretionary assets managed by other registered investment advisers using 3EDGE's model portfolios. AUA numbers do not include certain model portfolio assets with significant lag in data reporting.

Strategy Facts as of 12/31/22
Strategy Composite AUM **\$345.02M**
Inception Date 1/1/2016

The 3EDGE Conservative Strategy ("the Conservative Strategy") is a globally diversified, multi-asset portfolio, invested across a wide variety of asset classes and geographies. Investment exposure is achieved primarily through the use of index exchange traded funds (ETFs). The portfolio seeks to focus more on preservation of capital and management of volatility. It may be appropriate for investors who are more risk averse, who may rely on the portfolio for current income or who are investing with a relatively shorter time frame (1-3 years), at least for this component of their overall liquid assets. The Conservative Strategy doesn't necessarily focus on a particular target range for generating current income through dividends and interest, but rather takes a total return approach. Along with interest and dividends, the Conservative Strategy will also rely on potential capital appreciation as a component of total portfolio returns.

Investment Committee
Steve Cucchiaro - Chief Executive Officer, Chief Investment Officer

Fritz Folts - Managing Partner, Chief Investment Strategist

Bob Phillips - Managing Partner, Chief Technology Officer

Eric Biegeleisen, CFA® - Deputy Chief Investment Officer, Portfolio Manager

Monica Chandra - President, Head of Business Development

Lawrence Jules - Vice President, Head Trader

Current Composition as of 12/31/22

Target Asset Class Ranges

Equities	6% - 30%
Real Assets	4% - 22%
Intermediate-Term Fixed Income	10% - 88%
Short-Term Fixed Income and Cash	2% - 80%

Real Assets (Gold & Commodities) includes precious metals such as gold as well as investments that operate and derive much of their revenue in real assets, e.g., MLPs, metals and mining corporations, etc. Intermediate-Term Fixed Income includes fixed income funds with an average duration of greater than 2 years and less than 10 years. Short-Term Fixed Income and Cash includes cash, cash equivalents, money market funds, and fixed income funds with an average duration of 2 years or less.

Benchmark [‡]	9.70%	-2.73%	13.99%	9.67%	4.99%	-13.99%	4.27%

[‡]Benchmark is S&P Target Risk Conservative Total Return Index. See additional disclosures.

*Net performance reflects a hypothetical 3.00% annual fee assessed by Orion Portfolio Solutions. It is calculated and deducted on a monthly basis. 3EDGE Conservative Strategy's composite net performance will vary from the net performance shown here.

[†]3 Year, 5 Year, and Since Inception are annualized returns based on a period of 12 months using monthly returns. The Conservative Strategy composite creation date is 1/1/2016.

About 3EDGE

3EDGE Asset Management, LP, is a multi-asset investment management firm serving institutional investors, the advisor marketplace and private clients. 3EDGE strategies act as tactical diversifiers, seeking to generate consistent, long-term investment returns, regardless of market conditions, while seeking to manage downside risks.

The primary investment vehicles utilized in portfolio construction are exchange traded vehicles. The investment research process is driven by the firm’s proprietary global capital markets model. The model is tested over a wide variety of economic and market conditions and translates decades of research and investment experience into a system of causal rules and algorithms to describe global capital market behavior. 3EDGE offers a full suite of solutions that seek to meet investors’ different objectives. Of course, investing involves risks and the potential loss of your investment.

As of December 2022, the Conservative Multi-Asset Benchmark was retroactively changed from the composed Multi-Asset Benchmark to the S&P Target Risk Conservative Total Return Index. 3EDGE elected to make the change as the newly selected benchmark is widely recognizable and exhibits a correspondingly appropriate level of equity and fixed income allocation relative to each strategy, i.e., comparable risk. 3EDGE Asset Management’s investment objective is to seek to earn attractive risk-adjusted returns over full market cycles. We do not actively seek to outperform any specific benchmark index on a relative basis. Nonetheless, we utilize the S&P Target Risk Conservative Total Return Index (“the Benchmark”) for the Conservative Strategy. The Conservative Strategy is not an index fund and its portfolio holdings, country exposure, portfolio characteristics and performance will differ from that of the Benchmark. The Benchmark is simply a baseline against which we monitor the Conservative Strategy. It is intended to represent a passive, global, multi-asset class portfolio with similar risk characteristics to the Conservative Strategy. The Benchmark has not been selected as a specific benchmark to compare to the performance of the Conservative Strategy, but has been provided to allow for comparison of the performance of the Conservative Strategy to that of well-known and widely recognized indices. The Indices used in the Benchmark are represented by total return prices. Indexes are unmanaged and therefore do not include fees and expenses typically associated with investments in managed accounts. One cannot invest directly in an index. Benchmark Data Source: Bloomberg.

DEFINITIONS:

- The Morgan Stanley Capital International All Country World Index (MSCI ACWI) TR is designed to provide a broad measure of equity market performance throughout the world. Maintained by Morgan Stanley Capital International, it captures large and mid-cap representation across 23 developed and 23 emerging market countries, covering approximately 85% of the global investable equity opportunity set.
- The Financial Times Stock Exchange World Government Bond Index (WGBI) is a broad benchmark providing exposure to the global sovereign fixed income market. It measures the performance of fixed-rate, local currency, investment-grade sovereign bonds comprising sovereign debt from over 20 countries, denominated in a variety of currencies.
- The Bloomberg Commodity Index (BCOM) is a broadly diversified commodity price index tracking prices of futures contracts on physical commodities on the commodity markets. The Bloomberg Commodity Index Total Return (BCOMTR) reflects the BCOM on a “total return” basis, combining the BCOM returns with the returns on cash collateral invested in 13 week U.S. Treasury Bills.

The U.S. Dollar is the currency used to express performance. Returns are presented gross and net of a 3.00% fee requested by Orion Portfolio Solutions. They include the reinvestment of all income. Past performance is not indicative of future results.

DISCLOSURES: This Fact Sheet is provided to current and prospective clients for informational purposes only. It does not constitute an offer to buy or sell any security. The information is not intended to provide personal investment advice and does not consider the investment objectives and financial resources of the recipient. Performance for the Conservative Strategy is shown net of a hypothetical 3% management fee as required by Orion Portfolio Solutions. Since inception return has been provided as supplemental information to the compliant presentation. Composite AUM includes all accounts held within the composite as of the last day of the month shown. In terms of both asset classes and specific geographies, the Conservative Strategy may from time to time be outside of the percentage ranges listed when it is deemed appropriate by 3EDGE Asset Management. Although there are no fixed limitations on the exposure to any particular asset class in the Conservative Strategy, under normal market conditions the Conservative Strategy will tend to hold securities in the percentage ranges listed for each of the four mentioned asset classes. It is important to understand that although 3EDGE Asset Management seeks to manage risk in the Conservative Strategy, there is still a material amount of market risk (and equity risk in particular) embedded in the Conservative Strategy at all times and declines in the portfolio from time to time are inevitable. Even though we seek to manage risk and volatility, the portfolio certainly has the potential to decline in value. Investments including common stocks, fixed income, commodities, ETNs and ETFs involve the risk of loss that investors should be prepared to bear. Performance and AUM numbers are unaudited. Past performance is not indicative of future results.
